Notes:
1. All cells are DAT negative.
2. 's' = strong reactor, 'w' = weak reactor, NT = not tested
3. The f antigen status has been determined presumptively
4. Cell #6 is designated as R_0r but the phenotyping test results cannot exclude the possibility of the red blood cell genotype being R_0R_0.

* Indicates those antigens whose presence or absence may have been determined using only a single example of a specific antibody.
