

AliveDx

INNOVATE FOR LIFE

Create clinical and economic value with the MosaiQ[®] solution and Alba, high-quality blood bank reagents.

At AliveDx, we empower diagnostic insights, transform patient care, and innovate for life. With over 30-years in in-vitro diagnostics, we put the health of patients first by creating innovative solutions designed for faster disease detection to shorten the time to diagnosis.

MOSAIQ

The MosaiQ solution, an innovative multiplexing and multimodal solution, can help to bring about a diagnosis for patients by providing faster in-vitro test results. As an easy-to-use single solution, the platform performs multiple tests and gives maximum flexibility to laboratorians and clinicians.

ALBA

Our Alba blood bank reagents portfolio enables patients in need of a transfusion to have access to a safe and timely blood match as we facilitate both patient and donor blood screening. They are sold directly to laboratories or through our OEM partners.
