

ALBA

INTRODUCING THE ALBA ELUTION KIT.

The ALBA Elution Kit is used for the acid elution of antibodies from intact red blood cells for further detection and identification.

The kit offers the same high-quality and expert support that you expect from Alba, as well as other key features such as:

- > Kit volume sufficient to perform **10 elutions**
- > **Distinct pH change reactions**
- > **Room temperature storage**
- > Validated with **various methods and enhancement techniques**
- > **User-friendly instructions**
- > Minimal product waste thanks to **recyclable cardboard packaging**

AliveDx

WHY CHOOSE ALBA?

Expert technical support from experienced blood bankers

Samples and protocols for reagent evaluations available

Reliable customer service

Customizable cost savings analysis available

Alba's customers benefit from high-quality products that support and complement operational processes.

AliveDx

At AliveDx, we empower diagnostic insights, transform patient care, and innovate for life. With over 30-years in in-vitro diagnostics, we put the health of patients first by creating innovative solutions designed for faster disease detection to shorten the time to diagnosis. Alba—our blood bank reagents portfolio—and MosaiQ®—one of the first multiplexing and multimodality automated testing platforms—are designed to make labs more efficient and clinical decision-making more effective. Our journey started as Alba Bioscience, and later, Quotient. Today, as AliveDx, we innovate for life.
