## Notes:

- 1. All cells are DAT negative.
- 2. NT = Not tested.
- 3. The f antigen status has been determined presumptively.
- 4. Cell #4 is designated as  $R_0R_0$  based on the statistical probability for the source donor population but a genotype of  $R_0r$  cannot be excluded.
- \* Indicates those antigens whose presence or absence may have been determined using only a single example of a specific antibody.

| Conclusions/Further Testing Required: |       |  |
