ALBAcheck® Competency Testing Kit

Effective staff training and competency testing are critical to maintaining blood bank compliance and promoting best practices. However, developing and implementing a consistent, efficient assessment process can be challenging and time consuming – especially in a busy laboratory with limited resources.

Competency testing, simplified.

Streamline your process with the ALBAcheck Competency Testing Kit – an effective and convenient tool to train and assess staff and student competency in the identification of unknown antibodies.

The competency kit can also be used for the twice-yearly assessment of testing platforms.

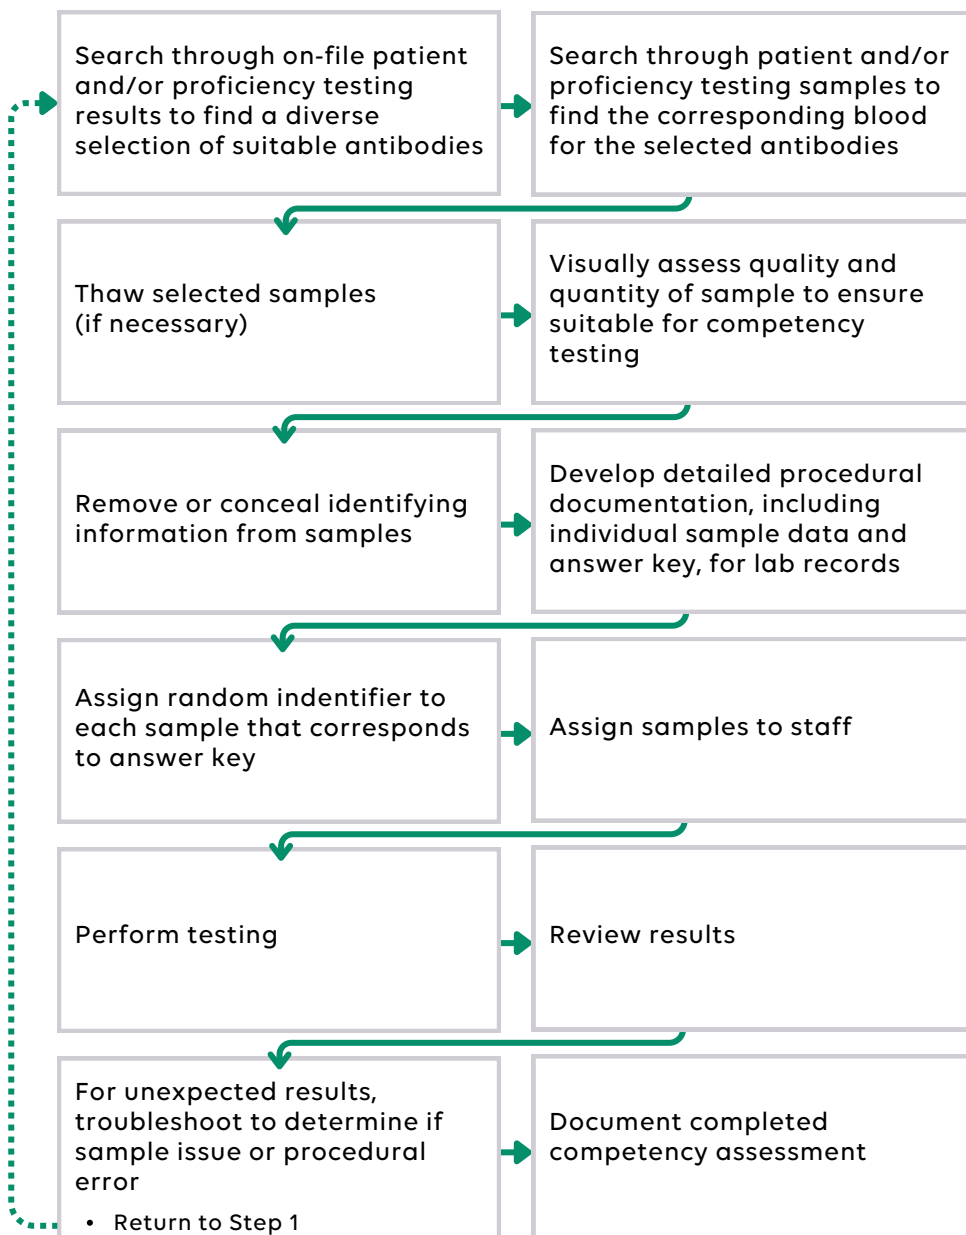

The ALBAcheck Competency Testing Kit includes 10 antibody samples (9 positive/1 negative) suitable for use with multiple methods (saline, LISS, PEG, and gel).

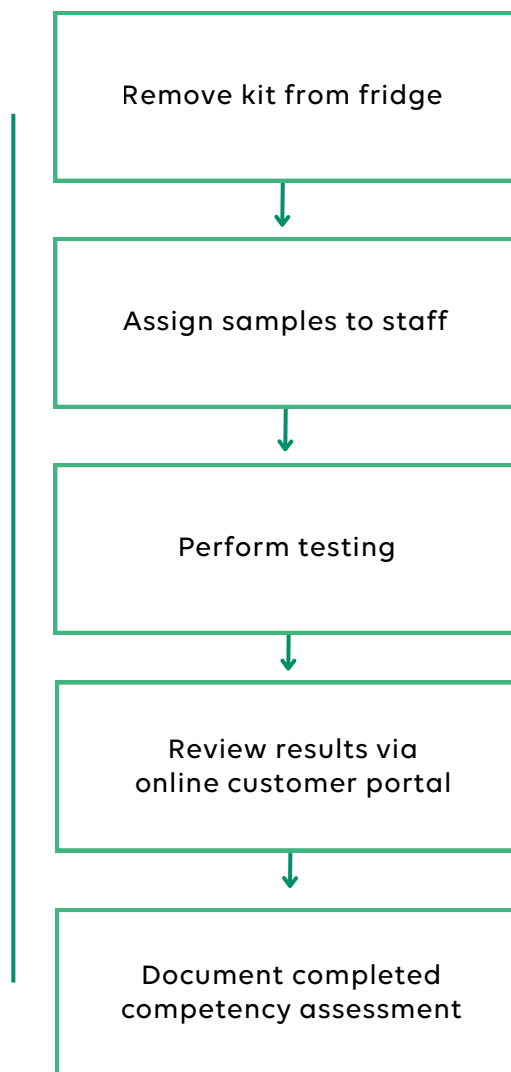

Looking to increase lab efficiency?

Compare a typical competency assessment process with the convenience of a ready-to-use kit.
