Patients cells																																				

- Notes:
- All cells are DAT negative.
  - 's' = strong reactor, 'w' = weak reactor, NT = not tested
  - The f antigen status has been determined presumptively
  - Cell #6 is designated as R<sub>0</sub>r but the phenotyping test results cannot exclude the possibility of the red blood cell genotype being R<sub>0</sub>R<sub>0</sub>.
- \* Indicates those antigens whose presence or absence may have been determined using only a single example of a specific antibody.
