Notes:

1. All cells are DAT negative.

2. 's' = strong reactor, 'w' = weak reactor, NT = not tested

3. The f antigen status has been determined presumptively

4. Cell #6 is designated as R₀r but the phenotyping test results cannot exclude the possibility of the red blood cell genotype being R₀R₀.

* Indicates those antigens whose presence or absence may have been determined using only a single example of a specific antibody.
